Sazid Mahmud

+880-1521212184 | sazidm@proton.me | github.com/schlafer | linkedin.com/in/sazid-mahmud-eee

Skills

- **Languages**: Go, Rust, Python, C/C++, Bash, SQL.
- **Backend & Systems**: PostgreSQL, Redis, RESTful APIs, gRPC, Docker, Concurrency, System Architecture.
- **DevOps & Tools**: Linux, Git, GitHub Actions (CI/CD), Grafana, Proxmox, Server Administration, Postman.

Work Experience

Technology Consultant Jan 2026 — Present

sazidmahmud.bd *Dhaka, Bangladesh*

- Translate business objectives into concrete technical specifications and phased implementation roadmaps.
- Advise clients on cloud deployment, containerization, CI/CD automation, and system security best practices.
- Reporting bugs, inconsistencies, or usability issues as well as suggesting new features to add.
- Consulting on scalable backend services and APIs, optimizing database queries and caching layers to reduce latency and infrastructure costs.

Projects

Learn Golang in Bangla github.com/schlafer/learn-golang-in-bangla

- Authored a comprehensive 31-chapter open-source reference guide for modern Go (Go 1.27+), covering iterators, generics, structured logging (`slog`), concurrency primitives, and HTTP networking.
- Architected an automated CI pipeline that compiles and validates 100% of code examples against recent Go toolchains to ensure example reliability across releases.
- Published interactive web documentation at golang.sazidmahmud.bd under dual licensing (MIT/CC BY-NC-SA 4.0), adopting practical engineering terminology for Bengali-speaking developers.

Ezpass github.com/schlafer/ezpass

- Built a zero-dependency CLI password generator and reusable Go package (`pkg/ezpass`) using `crypto/rand` and Fisher–Yates shuffling for uniform character distribution.
- Implemented Diceware passphrase generation via the EFF 7,776-word list, keyspace and Shannon entropy analysis, and granular character filtering (lookalike sanitization, custom symbols).
- Integrated cross-platform clipboard export supporting both native system utilities and ANSI OSC 52 escape sequences for remote SSH/tmux terminal workflows.

Mini-FM github.com/schlafer/mini-fm

- Developed a fast, keyboard-driven terminal file manager in Go with zero external runtime configuration, featuring fuzzy file filtering and inline path operations.
- Engineered a live preview pane supporting syntax highlighting and terminal image rendering via the Kitty graphics protocol.
- Implemented seamless shell synchronization by emitting dynamic `cd` and `$EDITOR` directives to preserve working directory state and history.

Publications

IEEE Global Energy Conference (GEC 2022) Oct 2022

Research Collaborator, AUST *DOI: 10.1109/GEC55014.2022.9986733*

- **"A Consumer Friendly Demand-Side-Management Technique for Residential Loads Supported by Two-Stage Genetic Algorithm Based Optimization"**
  - Formulated two-stage genetic algorithms to model and optimize residential appliance scheduling, minimizing peak electricity demand and consumer costs.

Extracurricular Activities

Webmaster @ IEEE AUST Student Branch Mar 2021 — Mar 2022

- Planned, developed, and maintained official website properties for the IEEE student branch using responsive modern web standards.
- Collaborated with executive committees to publish event portals, announcements, and digital media.
- Current Website

Vice Chair @ IEEE PES AUST Student Branch Chapter Mar 2021 — Mar 2022

- Directed chapter initiatives and coordinated technical seminars, workshops, and student engineering competitions.
- Assisted executive leadership in operational planning, budgeting, and member engagement.

Education

Ahsanullah University of Science and Technology Apr 2017 — Jan 2022

B.Sc. in Electrical and Electronic Engineering

- CGPA: 3.361/4.0
